## **PROJECT DESCRIPTION**

### *Underground Steam & Demineralized Water Distribution System*

This was a design/build project consisting of excavation, installing reinforced concrete pipe trench and the installation of 6" steam, 3" condensate, and 3" stainless demineralized water lines.

All work was performed in accordance with ASME code and Green Contracting Company's certified welding procedures. Minimal interruption of the customer's operations was accomplished through design and planning of the project.

### *Green Contracting's personnel:*
